Overview of the Project

The Polytechnic University of the Philippines (PUP) maintains various international student exchange initiatives with partner universities globally. The Student Exchange Centralized Intake is a web-based solution designed to digitize and optimize the application process for aspiring outbound students. By transitioning from traditional flat-file collectors like Google Forms to a centralized relational database, the system ensures data integrity, eliminates redundancy, and provides a scalable framework for long-term academic data management.

Normalization

Business Rules:

1. A student may have multiple applications, but each application is linked to one and only one student and is defined by university choices, preferences, document status, and endorsers.
2. A student must have exactly one guardian.
3. Endorsers (Program Adviser, Department Chair, College Secretary, and Dean) are specific for a particular application.
4. An application may have one to three university choices, and each university choice belongs to exactly one application.
